2012

Premessa

Con l'edizione 2012 il Rapporto Private Equity Monitor – PEM® giunge alla sua dodicesima pubblicazione.

Per il terzo anno consecutivo, il nostro Rapporto fornisce una fotografia di sostanziale stabilità dell'attività d'investimento sia con riferimento al numero di operazioni, sia alle dinamiche che la caratterizzano.

Di fatto, il mercato non sembra ancora aver avviato un solido percorso di recupero, segno di come questo comparto di investimento risenta ancora dell'incertezza e delle difficoltà in cui si trova la nostra economia.

Siamo quindi di fronte ad un mercato che conta circa 80 operazioni l'anno, diviso abbastanza equamente tra investimenti di minoranza e operazioni di buy out anche se, e forse questa è la vera novità, sempre più indirizzato verso imprese con fatturato inferiore ai 30 milioni di Euro.

Infine, prima di affrontare l'analisi di dettaglio è bene ricordare come lo studio di seguito presentato è frutto del lavoro di ricerca che nel corso degli anni ha portato alla costruzione di un database oggi costituito da oltre 1.200 operazioni di investimento realizzate a partire dal 1998 e disponibile on line previo apposito abbonamento.

Per ulteriori informazioni vi invitiamo a consultare il nostro sito all'indirizzo:
www.privateequitymonitor.it.

Introduction

This report is the twelfth edition of Private Equity Monitor – PEM®.

For the third consecutive year, this survey confirms a stability of investments both in terms of the number of deals, and their characteristic features.

As a matter of fact the market doesn't seem to have moved towards a steady recovery yet, as the rising uncertainty due to the economic crisis is still influencing this investment sector.

So, we are facing a market that counts about 80 investments each year, equally distributed between expansion and buy out deals. However, unlike the past, we have to underline that investors seem to pay attention to much smaller companies with revenues below 30 million Euro.

Finally, before passing on to a more detailed analysis, we would like to underline that this survey is the result of an annual research activity that has made possible the collection of a database of more than 1,200 investments made in Italy between 1998 and 2012, both in later stage and venture capital.

For further information please visit: www.privateequitymonitor.it.

La Metodologia

L'obiettivo del rapporto è quello di fornire una serie strutturata di informazioni riguardanti le caratteristiche dei deal, degli operatori coinvolti e delle aziende target, attraverso l'uso esclusivo di informazioni pubbliche reperibili presso archivi di giornali e riviste specializzate, pubblicazioni di settore, siti Internet, banche dati accessibili al pubblico, newsletter, presentazioni a convegni, nonché la collaborazione volontaria e diretta da parte degli operatori, nel pieno rispetto dei diritti di privacy degli stessi e delle aziende target.

Lo studio prende in considerazione soltanto i nuovi investimenti realizzati da investitori istituzionali nel capitale di rischio di matrice privata, in tutte le fasi successive a quelle di avvio di impresa, risultando pertanto esclusi dalla rilevazione:

- ✓ gli investimenti effettuati da società di investimento di matrice pubblica o para-pubblica (agenzie pubbliche, finanziarie regionali, ...);
- ✓ gli investimenti di seed e start up, cioè finalizzati alla nascita di nuove attività imprenditoriali;
- ✓ i reinvestimenti in società già partecipate dall'operatore indicato (follow on).

Per ogni operazione individuata, le informazioni acquisite sono state suddivise tra:

The Methodology

The aim of this research is to provide structured information about features of transactions, private equity houses involved and target companies. Only publicly available information has been used, including newspapers, specialised magazines and industry publication archives. Additionally some information comes from internet websites, public databases, newsletters, event presentations and direct voluntary contributions from investors and target companies, all in compliance with privacy rights.

This research only considers initial rounds of investments undertaken by non state-related private equity houses and investments in companies which are not in the start-up phase.

Hence, our study excludes the following:

- ✓ Deals undertaken by government institutions and regional government agencies;
- ✓ Seed and start-up deals;
- ✓ Second-round financing deals.

For each identified deal, the information is classified as follows:

a) Caratteristiche del deal, nell'ambito delle quali si è distinto tra:

- ✓ il nome dell'impresa target, cioè l'impresa oggetto di investimento. Nel caso di operazioni di Buy out, si è cercato di indicare il nome della newco o della target che rendesse più facilmente riconoscibile l'operazione esaminata;
- ✓ il principale investitore istituzionale o lead investor, che rappresenta l'operatore che ha investito la quota maggiore di capitale o che ha promosso il sindacato di investitori coinvolti nel deal;
- ✓ l'ammontare di equity investito e la quota di capitale direttamente o indirettamente acquisita;
- ✓ gli eventuali coinvestitori, ovvero tutti gli altri investitori di matrice finanziaria istituzionale che sono stati coinvolti nell'operazione, con separata indicazione dell'ammontare di equity da questi investiti e la relativa quota acquisita, laddove disponibile;
- ✓ la tipologia dell'operazione, distinguendo tra le categorie di Expansion, Replacement, Buy out e Turnaround;
- ✓ l'origine del deal, ossia la ragione in base alla quale è stata realizzata l'operazione, codificando tali informazioni attraverso le categorie riconosciute a livello internazionale e utilizzate per simili ricerche.

a) Deal characteristics:

- ✓ target name represents the company identified for the investment. In Buy-out deals, the newco or target names are presented to better identify the related investment;
- ✓ lead investor represents the investor with the highest proportion of share capital or the one that has led the investment syndicate;
- ✓ The amount of equity invested and the stake acquired (either directly or indirectly);
- ✓ The co-investors (if any) who took part in the deal, the amount and the percentage of equity interest acquired;
- ✓ Investment stage classified as Expansion, Replacement, Buy-out or Turnaround;
- ✓ Deal origin or the reason and basis on which the deal was set up. Deal origin information is classified consistently with the categories used in other similar international surveys.

b) Caratteristiche dell'impresa target, nell'ambito delle quali si è distinto tra:

- ✓ la localizzazione geografica, con riferimento alla regione in cui la target ha la sua sede;
- ✓ il settore industriale, codificato secondo la classificazione PEM® sviluppata sulla base di quella internazionale proposta dalla Standard Industrial Classification (SIC);
- ✓ la descrizione di dettaglio dell'attività svolta;
- ✓ il numero dei dipendenti;
- ✓ il fatturato (Sales), individuato come ammontare dei “ricavi netti di vendita”, per il quale è stato calcolato anche il tasso di crescita annuo composto (Compound Annual Growth Rate, CAGR) per i tre esercizi precedenti al deal;
- ✓ l'EBITDA (Earnings Before Interest Tax Depreciation and Amortization), margine operativo lordo;
- ✓ l'EBIT (Earnings Before Interest and Tax), reddito operativo;
- ✓ il rapporto EBITDA/Fatturato;
- ✓ l'Enterprise Value (EV), determinato considerando il valore attribuito al 100% dell'azienda al momento immediatamente precedente all'acquisizione;
- ✓ i multipli: EV/Sales, EV/EBITDA;
- ✓ il rapporto Debito netto/EBITDA per le sole operazioni di Buy out.

b) Target company characteristics:

- ✓ geographical area represents the Italian region where the target company is located;
- ✓ industry sector in accordance with the PEM® classification based on the Standard Industrial Classification (SIC Code);
- ✓ detailed activity description;
- ✓ number of employees:
- ✓ sales refers to “net sales” and sales for three years prior to the investment on the basis of the Compounded Annual Growth Rate (CAGR) calculation;
- ✓ EBITDA (Earnings Before Interest, Tax, Depreciation and Amortization);
- ✓ EBIT (Earnings Before Interest and Tax);
- ✓ EBITDA/Sales ratio;
- ✓ Enterprise Value (EV) defined as the value assigned to the entire target company, prior to the acquisition;
- ✓ Multiples: EV/Sales, EV/EBITDA;
- ✓ Net debt/EBITDA ratio for Buy-out transactions only.

IL MERCATO E LE PRINCIPALI EVIDENZE

Il mercato del private equity chiude il 2012 con un dato aggregato di 81 operazioni monitorate che, seppur in leggera contrazione rispetto all'anno precedente (-5%), conferma la tenuta di un comparto ancora alle prese con gli effetti prodotti dal perdurare della crisi economica in atto.

In termini di livello d'investimento, tuttavia, vi è da sottolineare anche per quest'anno l'importante contributo prestato dal Fondo Italiano d'Investimento (FII), che si conferma il principale operatore con una quota pari al 17% del mercato, equivalente a 14 deals portati a termine, di cui 10 nel solo secondo semestre.

Su questo fronte, l'attività d'investimento nel 2012 ha mostrato un andamento via via incrementale nel corso dell'anno. Il primo trimestre 2012, infatti, ha contato la realizzazione di 11 investimenti, il secondo trimestre 19, mentre nel terzo e quarto trimestre si sono registrate rispettivamente 26 e 25 operazioni.

Leggera contrazione anche per il numero di operatori attivi in Italia, che si attesta a quota 56 considerando sia i Lead che Co-investors (-7% rispetto al 2011). Tuttavia, le principali evidenze di mercato in tal senso rimangono pressoché stabili, con un rapporto operazioni/investitori invariato e pari a 1,4. Questo dato risulta ancora fortemente influenzato dal Fondo Italiano d'Investimento. Infatti, al netto dei suoi 14 closing, il rapporto si attesterebbe ad una media per singolo operatore pari a 1,2.

Il 2012, inoltre, segna anche l'avvio dell'operatività del Fondo Strategico Italiano, il cui contributo in termini di operazioni risulta ancora marginale (2 investimenti nel corso del 2012).

MARKET ANALYSIS AND RELEVANT FINDINGS

In 2012 the Observatory monitored 81 private equity deals that represent approximately a 5% decrease in comparison with the 85 transactions realized in 2011, confirming the market resistance to the current economic crisis.

However, in terms of investment activity also this year, we have to underline the important contribution of Fondo Italiano d'Investimento (FII) to the market, confirming its role of main player in the Italian private equity industry with 17% market share, corresponding to 14 deals closed (10 just in the second semester).

With reference to the yearly investment trend 2012 started with 11 closing deals in the first quarter, 19 in the second, ending with a 25 and 26 closing peaks respectively in the third and fourth quarter of the year.

The number of active investors in 2012 shows a slight decrease compared to 2011 (-7%), with 56 leads and co-investors closing at least a deal. However, the deals/investors ratio remain stable at 1.4. As in the last year, this ratio has been affected by the deals conducted by Fondo Italiano d'Investimento. Without these 14 deals, the ratio would be equal to 1.2.

Furthermore, 2012 marks the beginning of the activity of Fondo Strategico Italiano but his contribution in terms of investments is still residual (2 deals closed during the year).

In termini di concentrazione, nel 2012, 12 operatori hanno raccolto intorno a sé il 50% dell'intera attività d'investimento. Al netto dell'attività del FII tale dato non sembra discostarsi di molto (15 operatori).

A livello di "investimento tipo", nel 2012 sembrano in prima analisi confermarsi le operazioni di sviluppo, mentre sul fronte dimensionale il volume dei ricavi medio delle target risulta in diminuzione e pari a 38 milioni di Euro, in flessione di circa il 15% rispetto al livello 2011 (45 milioni di Euro).

PROFILO MEDIO DELL'INVESTIMENTO NEL CORSO DEL 2012

Tipologia d'operazione	Expansion
Quota acquisita	50%
Deal origination	Family & Private
Regione	Lombardia
Settori	Prodotti industriali
Volume dei ricavi (Mln €)	38,0
Enterprise Value (Mln €)	46,5
EV/EBITDA	6,8x

In termini di Enterprise Value delle società oggetto di acquisizione, nonostante un multiplo sull'EBITDA salito a 6,8x rispetto a 6,3x del 2011, il valore medio si assesta a 46,5 milioni di Euro, in calo del 18% sul dato dell'anno precedente (53,5 milioni di Euro).

In terms of market concentration in 2012, 12 investors have gathered 50% of the total investment activity. Without FII these data do not appear to change much.

As for the structure of the market, 2012 seems to confirm the preference of investors for expansion deals, particularly for companies with average revenues of 38 million Euro, level that has fallen by 15% compared to 2011, when average revenues were 45 million Euro.

INVESTMENT PROFILE IN 2012

Investment stage	Expansion
Acquired stake	50%
Deal origination	Family & Private
Geographical Area	Lombardia
Sectors	Industrial products
Sales (Mln €)	38,0
Enterprise Value (Mln €)	46,5
EV/EBITDA	6,8x

Finally, despite the increase of the EV/EBITDA multiple in 2012 (6,8x compared to 6,3x in 2011) the Enterprise average Value settled at 46,5 million Euro (-18% in comparison with 2011).

LE CARATTERISTICHE DELLE OPERAZIONI

Focalizzandoci sulle modalità d'investimento, il mercato pare a prima vista sempre più orientato verso operazioni di expansion, oramai in continua crescita dal 2007. Vi è però da sottolineare come il dato risulti particolarmente influenzato negli ultimi 2 anni dall'incidenza del numero di operazioni targate Fondo Italiano d'Investimento (14 nel 2012 e 17 nel 2011).

Considerando l'intero gruppo di investitori, quindi, il 2012 si chiude con una percentuale di expansion pari al 49% del totale. Le operazioni di buy out seguono con una quota del 46% (nel 2011 erano al 42%). Tuttavia, al netto del FII, tale distribuzione risulterebbe a favore delle operazioni di maggioranza con il 54% del mercato rispetto al 40% delle operazioni di sviluppo.

Residue e in contrazione le altre tipologie di operazioni. I turnaround hanno raccolto il 4% del mercato, mentre i replacement l'1%.

In termini di deal origination, non emergono particolari inversioni di tendenza. Nonostante la maggioranza delle operazioni abbia avuto origine nell'ambito di imprese familiari, la loro incidenza sul campione rimane pressoché stabile dal 2009.

Le cessioni di rami d'azienda da parte di gruppi nazionali si confermano stabili al 21% dei casi e in linea con i valori dell'anno precedente. Nuova flessione per le acquisizioni di rami d'azienda facenti parte di gruppi multinazionali stranieri, che dal 2010 ad oggi hanno perso circa la metà della loro incidenza sul campione, attestandosi al 4%. I secondary buy out rappresentano invece per il secondo anno consecutivo l'11% del mercato.

DEALS CHARACTERISTICS

If we focus on investment trends, the market is oriented towards expansion capital deals, a type of investment that has constantly increased since 2007.

However, in the last two years we must consider that this trend has been influenced by the number of investment closed by FII (14 deals in 2012 and 17 in 2011).

Considering the total number of investors active on the market, 2012 ended with a 49% expansion, followed by a 46% buy outs (42% in 2011). Nevertheless, without the investment activity of FII, the market distribution would be different with 54% buy outs against 40% expansion capital deals.

The other types of investments are residual and in contraction. Turnaround investments represent 4% of the market while replacement capital dropped to 1% from 6% in 2011.

With reference to Deal origination, nothing has changed from recent years. The research confirms a central role of "Family & Private", steady from 2009.

Local parent confirms his 21% percentage like the past year while the category "foreign parent" has fallen again (4% of the market in 2012), falling by more than half since 2010.

For the second year running, secondary buy outs have represented 11% of the market.

Un lieve incremento rispetto al 2011 si registra per le altre modalità di origination (in particolare si segnalano le cessioni di asset infrastrutturali da parte di società pubbliche a fondi d'investimento specializzati in tale comparto).

La Lombardia come da tradizione mantiene il primato di regione più attiva, concentrando al suo interno circa il 38% degli investimenti totali, con la sola provincia di Milano a rappresentare il 17% dell'intero mercato nazionale. A seguire non si registrano particolari differenze rispetto all'anno precedente, con l'Emilia Romagna (11 operazioni), il Veneto (10) e il Piemonte (9) che rafforzano ancor più il primato del Nord Italia.

Il gap con il Mezzogiorno rimane ancora molto forte, con la mappatura di sole 4 operazioni, peraltro tutte concentrate in Campania.

LE CARATTERISTICHE DELLE SOCIETÀ TARGET

Per quanto concerne i settori d'intervento privilegiati, si conferma il consolidamento verso imprese manifatturiere tradizionali (beni per l'industria), che con una quota del 30% del campione aumentano il divario rispetto al loro antagonista storico, ovvero le aziende operanti nel comparto dei beni di consumo (19%).

Interessante la performance del settore alimentare che raccoglie intorno a sé circa l'11% delle preferenze.

A seguire, tra le attenzioni degli operatori, il settore ICT con il 9%.

Raddoppia l'incidenza del settore farmaceutico e biofarma raggiungendo il 6% del mercato. Con una percentuale del 4%, in chiara flessione rispetto al 9% del 2011, il settore del cleantech. Infine, dopo l'assenza nel 2011, si segnala il ritorno (seppur in modo esiguo) dell'interesse da parte degli

Compared to 2011 a slight increase can be noticed for other types of origination, due to some sales of infrastructural asset from public companies to specialized investment funds.

As for the geographical distribution of investments Lombardy remains the most attractive area for Italian private equity players with 38% of the market. Firms based in Milan only represent 17% of the total deals. There have been no significant changes from previous years in Emilia Romagna (11 deals), Veneto (10) and Piemonte (9), thus consolidating the northern leadership.

During 2012, the gap with the southern regions has become bigger and bigger, with only 4 investments closed in region of Campania.

TARGETS CHARACTERISTICS

For what concerns the sector distribution, the survey shows a preference of market players from the traditional manufacturing industry, with 30% market share, increasing the gap with the area of consumer goods (19% in 2012).

Excellent performance for the food and beverage industry that, representing 11% of the sector preferences, has reached the third position on the market, followed by ICT with 9%.

The pharmaceutical and biopharma have doubled their impact, reaching 6% of the market. The cleantech, with a percentage of 4% compared to 9% of 2011, clearly drop.

Finally, difficulties for tertiary, that fell from 13% of 2011 to 4% of 2012. Moreover, the survey shows the limited return of investors interest to financial services with 2%.

investitori verso il settore dei servizi finanziari (2%).

Difficoltà invece per il comparto del terziario che vede la sua quota d'incidenza sul totale del campione più che ridotta dei due terzi, passando dal 13% del 2011 al 4% del 2012.

Con riferimento alle caratteristiche economico-finanziarie delle imprese target, nonostante il dato mediano risulti pari a circa 38 milioni di Euro, la distribuzione per classi di fatturato evidenzia come il bacino d'intervento degli operatori abbia avuto come riferimento principale imprese con fatturato inferiore ai 30 milioni di Euro, equivalenti al 46% del campione e in crescita di 10 punti percentuali rispetto al 2011.

Di fatto, che si tratti di maggioranze o minoranze, il mercato sembra spostarsi sempre più verso fasce dimensionalmente più ridotte rispetto al passato.

A conferma di ciò, si riscontra sia una diminuzione di operazioni nel segmento compreso tra i 30 milioni di Euro e i 60 milioni di Euro (dal 27% del 2011 al 21% del 2012), sia in misura ancor più evidente nella fascia superiore ai 300 milioni di fatturato, che subisce una flessione pari ad oltre il 50% (dal 10% del 2011 al 4% del 2012). Si conferma invece con una percentuale del 21% l'intervallo di fatturato compreso tra i 101 milioni di Euro e i 300 milioni di Euro. Sempre marginale la fascia compresa tra i 61 milioni di Euro e i 100 milioni di Euro, che si attesta all'8% del mercato.

From the point of view of the size of a target company despite average sales of 38 million Euro, the distribution by revenues shows how investors have preferred companies with a level of sales lower than 30 million Euro which means 46% of the market, with a 10 percent increase from 2011.

Thus, overall market players seem to pay more and more attention to smaller companies compared to the past.

In fact, the survey shows both a decrease in the 30-60 million Euro range (falling from 27% in 2011 to 21% in 2012), and a decrease by over 50% in the 300 million Euro range, dropped from 10% in 2011 to 4% in 2012.

The range between 101 million Euro and 300 million Euro confirms its market share of 21%.

Finally, the 61 million Euro - 100 million Euro range, with its 8% of the market remains marginal as usual.

I PREZZI DELLE ACQUISIZIONI E LA LEVA FINANZIARIA

Con riferimento al multiplo sull'EBITDA, nei 12 mesi monitorati dall'Osservatorio, il valore assegnato dagli investitori alle società target ha conosciuto un aumento, posizionandosi a circa 6,8 volte l'EBITDA, dato in linea con i livelli 2010 ed in aumento rispetto all'anno precedente (6,3x).

Distinguendo i multipli registrati per tipologia di operazione e in particolare tra maggioranze e minoranze, emerge però una particolarità interessante.

Se nel 2011 le maggioranze erano state pagate mediamente circa 8,5x l'EBITDA, nel 2012 il multiplo ha conosciuto una riduzione a 7,0x, mentre gli expansion, che nel 2011 erano stati valorizzati mediamente 5,5x, sono risultati nel corso del 2012 più cari rispetto al passato, posizionandosi a 6,8x il margine operativo lordo.

Il multiplo pagato mediamente rispetto al fatturato aziendale si conferma intorno ad 1,0x, invariato rispetto al 2011.

Di seguito, si riportano alcuni grafici rappresentativi delle caratteristiche del mercato ed il dettaglio delle operazioni censite.

MULTIPLES AND LEVERAGE DYNAMICS

As for prices, during 2012 the average EV/EBITDA multiple was around 6.8x, 8% more than the EBITDA multiple of 2011, which was 6.3x.

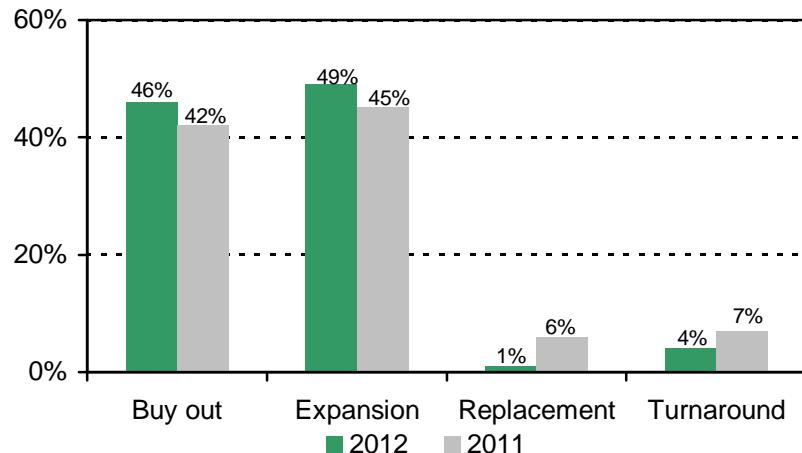

However, if we compare the prices of Expansion deals with Buy out deals, we can find some interesting differences.

If in 2011 the buy outs were paid with an average EBITDA multiple of 8.5x, in 2012 this ratio has decreased to 7.0x, while expansion capital deals that in 2011 were paid with an average of 5.5x, reached in 2012 a peak of 6.8x the average EBITDA margin.

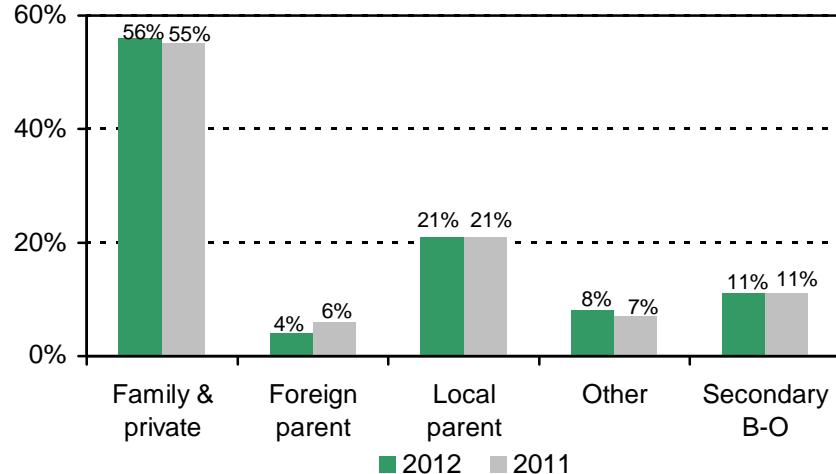

As in previous years, in 2012 the average EV/Sales multiple paid was equal to 1,0x.

The following section shows charts of the deals analysed and the related details.

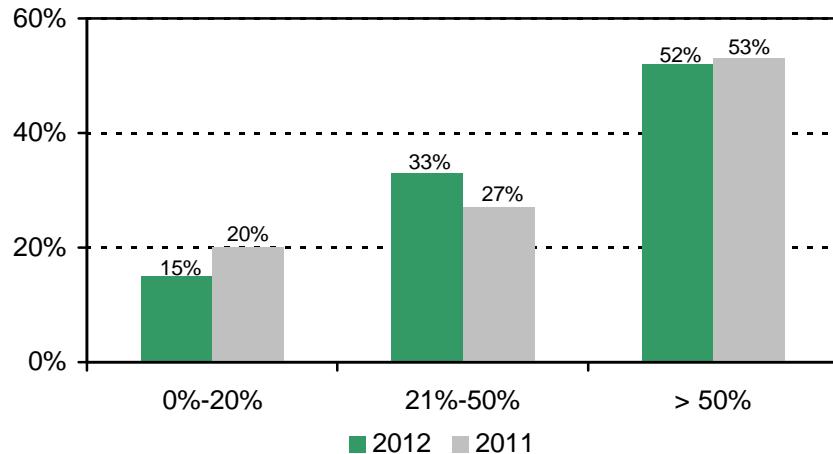

2012 Vs 2011: % Distribution by stage of investment

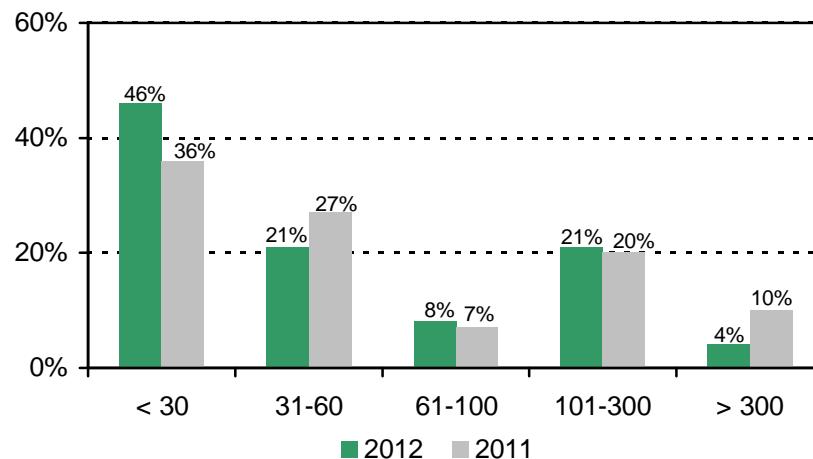

2012 Vs 2011: % Distribution by deal origination

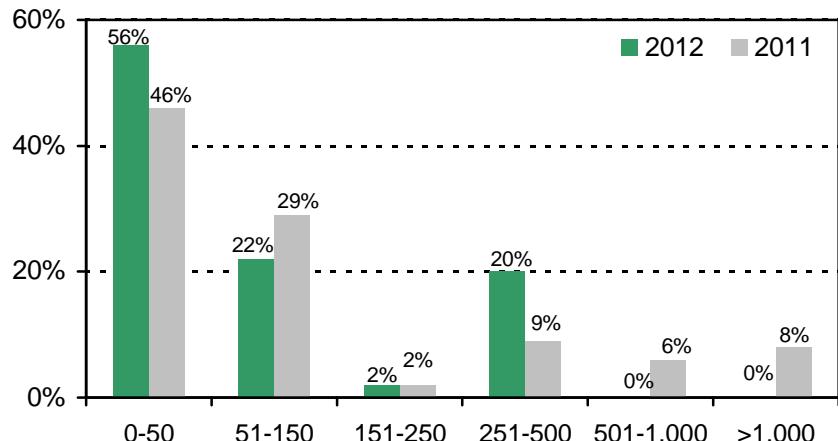

2012 Vs 2011: % Distribution by lead investor acquired stake

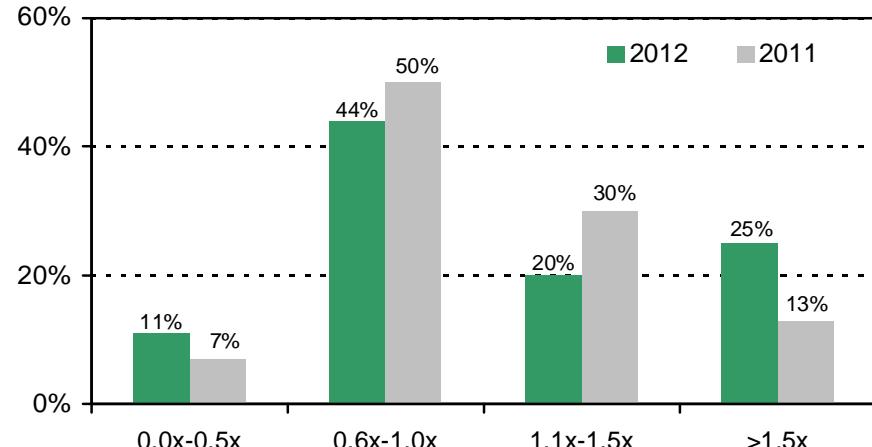

2012 Vs 2011: % Distribution by target company sales (€ Mln)

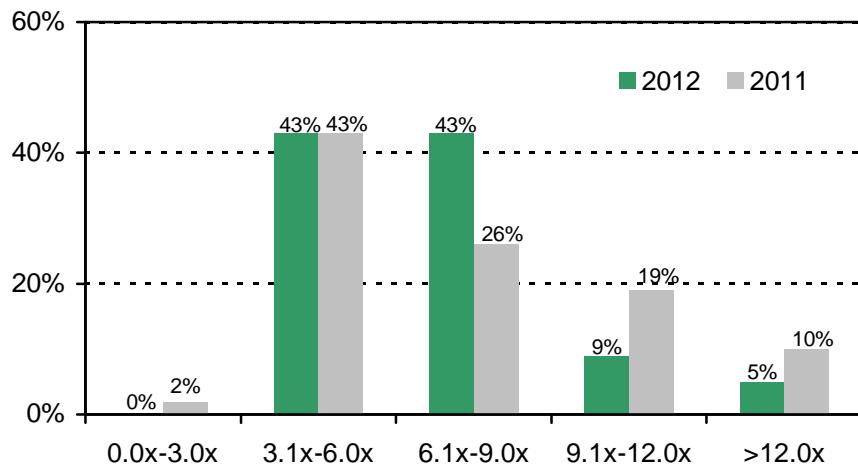

2012 Vs 2011: % Distribution by Enterprise Value

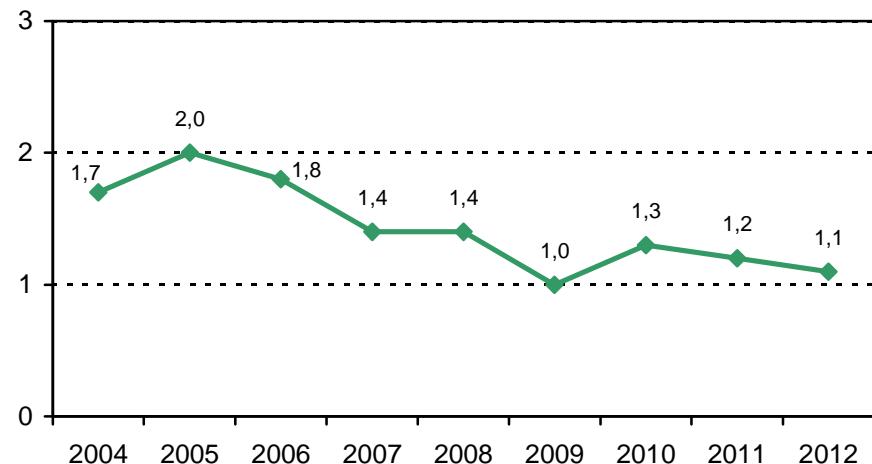

2012 Vs 2011: % Distribution by target company EV/Sales

2012 Vs 2011: % Distribution by target company EV/EBITDA

2004-2012 Buy out: Net debt/Equity ratio trend

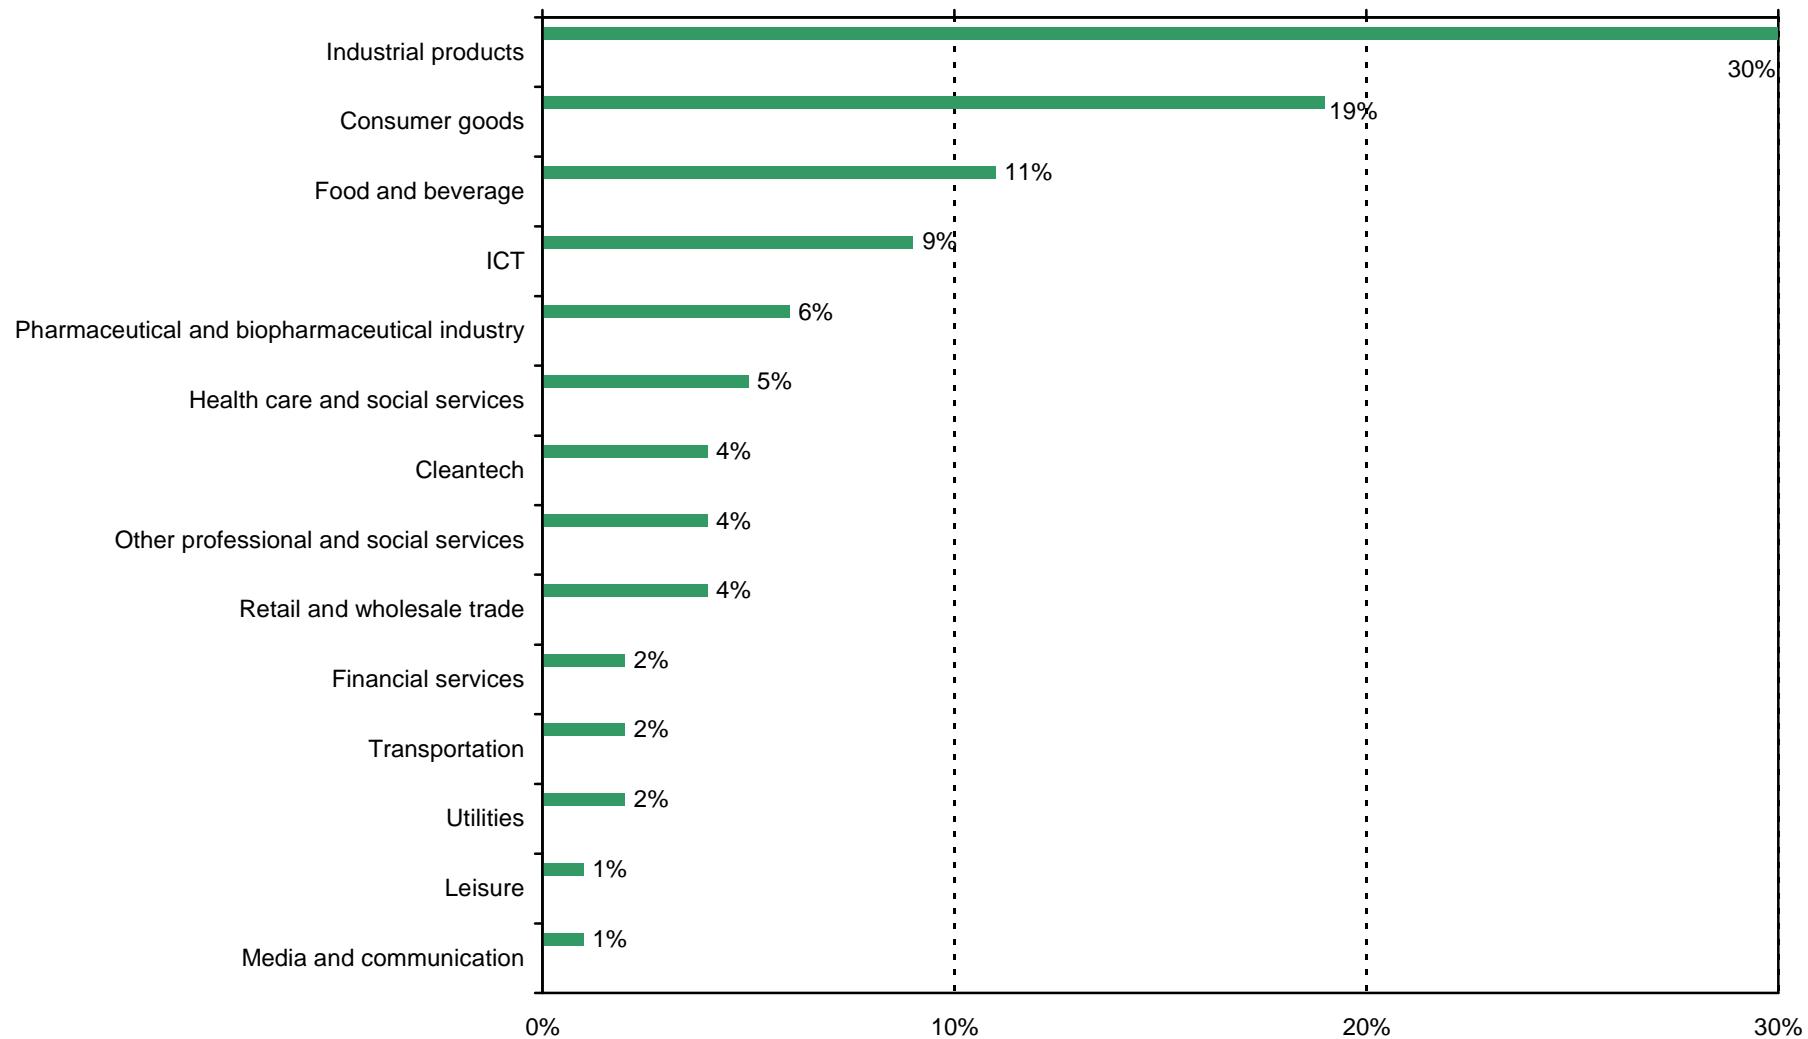

2012: Regional distribution of target companies

2000-2012: Total number of deals by region

2012: Sector distribution of target companies

Fondo Italiano d'Investimento SGR is the management company of the first private equity fund (Fondo Italiano di Investimento) promoted by the Italian Ministry of Finance with the co-operation of Associazione Bancaria Italiana (Italian Banking Association), Cassa Depositi e Prestiti, Confindustria (Industrial Association), Intesa Sanpaolo, Banca Monte dei Paschi di Siena e Unicredit. Following its first closing, Fondo Italiano di Investimento (the Fund) reached total commitment of 1.2 billion Euro. The Fund will be invested both in direct investments and third party managed ("Fund-of-Funds") funds. With regards to the direct investments, the Fund targets high-growth Italian companies with turnover between 10-250 million Euros with expansion ambitions mainly through internationalization. The Fund will invest mainly in minority positions, although attention is also given to management buy-in/buy-out, replacement in the presence of generational changes and corporate governance issues that could affect the development of the company. The Fund-of-Funds activity aims at investing in private equity vehicles or closed-end funds characterized by an investment strategy consistent with the policy of the Fund and managed by teams with proven experience and professionalism.

SJ Berwin is a law firm that has achieved international prominence – in large measure because of an outstanding private equity practice. Established in 1982 and with over 160 partners and 350 lawyers based in 11 offices in the major financial centres of Europe, the Middle East and Asia, we have worked on some of the largest and most complex cross-border and multi-jurisdictional transactions. For more than three decades, we have designed ingenious structures and solutions for numerous clients at the forefront of private funds in all jurisdictions. With offices in Berlin, Brussels, Dubai, Frankfurt, Hong Kong, London, Luxembourg, Madrid, Milan, Munich, Paris and Shanghai, and with over 90 dedicated PE lawyers, we comprise one of the largest teams of dedicated private funds lawyers in the world. SJ Berwin's International Funds group has been recognised as a market leader in fund structuring. We have advised on hundreds of funds in our three decades of experience, and as a result, we have an unparalleled depth of knowledge. The Italian office of SJ Berwin advises private equity institutions on a wide range of matters, extending far beyond fund structuring, underpinned by sound commercial understanding and innovative bespoke solutions, including: management buyouts, buy-ins, exits, venture capital investments and public-to-private work, across a number of sectors including consumer, retail, healthcare & life sciences, financial institutions, automotive, real estate, and energy & infrastructure. The team includes specialists who have also led the way in fast developing areas such as emerging markets, distressed debt, mezzanine and clean technology.
