## Premessa

Con l'edizione 2015 il Rapporto Private Equity Monitor – PEM<sup>®</sup> giunge alla sua quindicesima pubblicazione.

Dopo anni di alti e bassi, il 2015 segna un significativo incremento dell'attività di investimento, che torna ad attestarsi, nella sostanza, sui livelli precedenti alla crisi.

Nel corso dell'anno, infatti, il livello di attività si è mostrato particolarmente intenso ed il numero delle operazioni concluse, 109, lo dimostra (un dato paragonabile non veniva registrato dal 2008).

I Buy out si confermano, come lo scorso anno, le operazioni a cui gli investitori hanno fatto più ricorso, a discapito delle operazioni di minoranza. Anzi, tale categoria di operazioni accresce ulteriormente il proprio ruolo di leadership all'interno del mercato.

Chiudiamo come di consueto ricordandovi come lo studio di seguito presentato sia frutto di un lavoro di ricerca che nel corso degli anni ha portato alla costruzione di un database oggi costituito da oltre 1.400 operazioni di investimento realizzate a partire dal 1998 e disponibile *on line* previo apposito abbonamento.

Per ulteriori informazioni sui nostri lavori: [www.privateequitymonitor.it](http://www.privateequitymonitor.it).

---

## Introduction

This report is the fifteenth edition of Private Equity Monitor – PEM<sup>®</sup>.

After up and down in the last years, 2015 marks a huge hike in investment activity, which returns to pre-crisis level.

In fact, during this year, the level of activities has been particularly intense and the number of closed investments, 109, confirms this evidence (a similar data was not recorded since 2008).

As in the last year, Buy outs are the operations in which investors have had more appeal, to the detriment of minority's operations. Moreover, this category of operations increases its leadership inside the market.

The study presented below is the result of a research activity which has built in the years a database consisting, today, of over 1.400 operations realized since 1998 and available online with a previous subscription.

For further information please visit: [www.privateequitymonitor.it](http://www.privateequitymonitor.it).

---

## La Metodologia

---

L'obiettivo del rapporto è quello di fornire una serie strutturata di informazioni riguardanti le caratteristiche dei deal, degli operatori coinvolti e delle aziende target, attraverso l'uso esclusivo di informazioni pubbliche reperibili presso archivi di giornali e riviste specializzate, pubblicazioni di settore, siti Internet, banche dati accessibili al pubblico, newsletter, presentazioni a convegni, nonché la collaborazione volontaria e diretta da parte degli operatori, nel pieno rispetto dei diritti di privacy degli stessi e delle aziende target.

Lo studio prende in considerazione soltanto i nuovi investimenti realizzati da investitori istituzionali nel capitale di rischio di matrice privata, in tutte le fasi successive a quelle di avvio di impresa, risultando pertanto esclusi dalla rilevazione:

- ✓ gli investimenti effettuati da società di investimento di matrice pubblica o para-pubblica (agenzie pubbliche, finanziarie regionali, ...);
- ✓ gli investimenti di seed e start up, cioè finalizzati alla nascita di nuove attività imprenditoriali;
- ✓ i reinvestimenti in società già partecipate dall'operatore indicato (follow on).

---

## The Methodology

---

The aim of this research is to provide structured information about features of transactions, private equity houses involved and target companies. Only publicly available information has been used, including newspapers, specialised magazines and industry publication archives. Additionally some information comes from internet websites, public databases, newsletters, event presentations and direct voluntary contributions from investors and target companies, all in compliance with privacy rights.

This research only considers initial rounds of investments undertaken by no state-related private equity houses and investments in companies which are not in the start-up phase.

Hence, our study excludes the following:

- ✓ deals undertaken by government institutions and regional government agencies;
- ✓ seed and start-up deals;
- ✓ second-round financing deals.

---

Per ogni operazione individuata, le informazioni acquisite sono state suddivise tra:

**a) Caratteristiche del deal**, nell'ambito delle quali si è distinto tra:

- ✓ il nome dell'impresa target, cioè l'impresa oggetto di investimento. Nel caso di operazioni di Buy out, si è cercato di indicare il nome della newco o della target che rendesse più facilmente riconoscibile l'operazione esaminata;
- ✓ il principale investitore istituzionale o lead investor, che rappresenta l'operatore che ha investito la quota maggiore di capitale o che ha promosso il sindacato di investitori coinvolti nel deal;
- ✓ l'ammontare di equity investito e la quota di capitale direttamente o indirettamente acquisita;
- ✓ gli eventuali coinvestitori, ovvero tutti gli altri investitori di matrice finanziaria istituzionale che sono stati coinvolti nell'operazione, con separata indicazione dell'ammontare di equity da questi investiti e la relativa quota acquisita, laddove disponibile;
- ✓ la tipologia dell'operazione, distinguendo tra le categorie di Expansion, Replacement, Buy out e Turnaround;
- ✓ l'origine del deal, ossia la ragione in base alla quale è stata realizzata l'operazione, codificando tali informazioni attraverso le categorie riconosciute a livello internazionale e utilizzate per simili ricerche.

For each identified, the information is classified as follows:

**a) Deal characteristics:**

- ✓ target name represents the company identified for the investment. In Buy out deals, the newco or target names are presented to better identify the related investment;
- ✓ lead investor represents the investor with the highest proportion of share capital or the one that has led the investment syndicate;
- ✓ the amount of equity invested and the stake acquired (either directly or indirectly);
- ✓ the co-investors (if any) who took part in the deal, the amount and the percentage of equity interest acquired;
- ✓ investment stage classified as Expansion, Replacement, Buy out or Turnaround;
- ✓ deal origin or the reason and basis on which the deal was set up. Deal origin information is classified consistently with the categories used in other similar international surveys.

**b) Caratteristiche dell'impresa target**, nell'ambito delle quali si è distinto tra:

- ✓ la localizzazione geografica, con riferimento alla regione in cui la target ha la sua sede;
- ✓ il settore industriale, codificato secondo la classificazione PEM® sviluppata sulla base di quella internazionale proposta dalla Standard Industrial Classification (SIC);
- ✓ la descrizione di dettaglio dell'attività svolta;
- ✓ il numero dei dipendenti;
- ✓ il fatturato (Sales), individuato come ammontare dei “ricavi netti di vendita”, per il quale è stato calcolato anche il tasso di crescita annuo composto (Compound Annual Growth Rate, CAGR) per i tre esercizi precedenti al deal;
- ✓ l'EBITDA (Earnings Before Interest Tax Depreciation and Amortization), margine operativo lordo;
- ✓ l'EBIT (Earnings Before Interest and Tax), reddito operativo;
- ✓ il rapporto EBITDA/Fatturato;
- ✓ l'Enterprise Value (EV), determinato considerando il valore attribuito al 100% dell'azienda al momento immediatamente precedente all'acquisizione;
- ✓ i multipli: EV/Sales, EV/EBITDA.

**b) Target company characteristics:**

- ✓ geographical area represents the Italian region where the target company is located;
- ✓ industry sector in accordance with the PEM® classification based on the Standard Industrial Classification (SIC Code);
- ✓ detailed activity description;
- ✓ number of employees;
- ✓ sales refers to “net sales” and sales for three years prior to the investment on the basis of the Compounded Annual Growth Rate (CAGR) calculation;
- ✓ EBITDA (Earnings Before Interest, Tax, Depreciation and Amortization);
- ✓ EBIT (Earnings Before Interest and Tax);
- ✓ EBITDA/Sales ratio;
- ✓ Enterprise Value (EV) defined as the value assigned to the entire target company, prior to the acquisition;
- ✓ multiples: EV/Sales, EV/EBITDA.

---

## IL MERCATO E LE PRINCIPALI EVIDENZE

---

Il mercato del private equity chiude il 2015 con un dato aggregato di 109 operazioni monitorate e un incremento di circa il 22% rispetto alle 89 operazioni del 2014: si conferma il trend crescente intrapreso nell'ultimo biennio. Solo nel triennio 2006-2008, infatti, si sono registrati livelli di attività più elevati. In termini di trend infrannuale, si evidenzia una omogeneità nel corso dei quattro trimestri (mediamente 25 operazioni ogni tre mesi, ad eccezione del periodo estivo, durante il quale, a differenza di quanto accaduto storicamente, si rileva la maggior operatività con ben 33 investimenti).

Ad aggiudicarsi il titolo di operatore più attivo nel corso del 2015 è Clessidra, che chiude con 5 operazioni (di cui un add-on). Seguono, con 4 investimenti, Ardian ed Assietta Private Equity. Sono stati, inoltre, registrati 21 add-on (rappresentanti il 19% delle 109 operazioni chiuse). Tale dato risulta in aumento rispetto a quello del 2014 (8 deals, 9% del mercato).

In termini di offerta, si rileva un sostanziale aumento del numero di operatori attivi in Italia, che si attesta a quota 83 considerando sia i Lead che i Co-investors (+12% rispetto al 2014). Il rapporto tra operazioni concluse e numero di operatori risulta, pertanto, pari a 1,4 (vs 1,2 nel 2014). Inoltre, nell'anno appena concluso, si conferma il ruolo di assoluto rilievo degli investitori esteri (ben il 53% delle operazioni è stato concluso da fondi non domestici, contro il 51% del 2014).

Parallelamente, risulta in calo il livello di concentrazione nel 2015: 26 operatori hanno raccolto intorno a sé il 50% dell'attività d'investimento. Il mercato risulta, dunque, meno concentrato rispetto al 2014, anno in cui circa la metà delle operazioni era stata realizzata da 20 operatori.

---

## MARKET ANALYSIS AND RELEVANT FINDINGS

---

The private equity market closes 2015 with 109 monitored operations and an increase of approximately 22% in comparison to 89 operations in 2014: it is confirmed the positive trend of the last two years. Only in 2006, 2007 and 2008, the analysis has recorded higher activities. Regarding infrannual trend, it is underlined an homogeneity during the four quarters (with an average of 25 operations quarterly, exceptionally for summer period, in which 33 investments have been observed, on the contrary of what has usually happened in the past).

Clessidra results the most active operator, with its 5 operations (one of them is an add-on), followed by Ardian and Assietta Private Equity, each one with 4 investments. During 2015, 21 add-on have been observed (19% of the total 109 operations), increasing with reference to 2014 (8 operations, equal to 9% of the whole market).

Regarding supply side, the number of active operators in Italy has risen and results equal to 83 considering both Lead and Co-investors (+12% in comparison to 2014). The ratio of closed deals and number of operators is equal to 1,4 (average for each single investor, vs 1,2 during 2014). Moreover, in the last year, foreign investors confirm their absolute significant position (53% of operations has been closed by non-domestic funds, in comparison to 51% in 2013).

In terms of market concentration, during 2015, 26 investors have gathered 50% of the whole investment activity. Therefore, the market results less concentrated than the previous year, in which about half operations were realized by 20 operators.

A livello di “investimento tipo”, nel 2015 mantengono e consolidano la propria leadership le operazioni di Buy out, mentre sul fronte dimensionale il volume dei ricavi mediano delle target risulta essere pari a 34,2 milioni di Euro, in calo rispetto al dato del 2014 (54 milioni di Euro).

#### PROFILO MEDIO DELL'INVESTIMENTO NEL CORSO DEL 2015

<b>Tipologia d'operazione</b>	Buy out
<b>Quota acquisita</b>	85%
<b>Deal origination</b>	Family & Private
<b>Regione</b>	Lombardia
<b>Settori</b>	Prodotti per l'industria
<b>Volume dei ricavi (Mln €)</b>	34,2
<b>Enterprise Value (Mln €)</b>	79,6
<b>EV/EBITDA</b>	7,7x

Con riferimento all'Enterprise Value mediano delle società oggetto di acquisizione, si è passati dai 100 milioni di Euro del 2014 ai 79,6 milioni di Euro nel 2015. Tale evidenza è riconducibile alle minori dimensioni medie delle target, sia a livello di revenues, sia a livello di numero di dipendenti (89, rispetto ai 197 del 2014).

As “standard investment”, in 2015, Buy out deals maintain and consolidate their leadership inside the market, while the average sales volume of target companies results equal to 34,2 million Euro, showing a significant decrease in comparison to 2014 (54 million Euro).

#### INVESTMENT PROFILE IN 2015

<b>Investment stage</b>	Buy out
<b>Acquired stake</b>	85%
<b>Deal origination</b>	Family & Private
<b>Geographical area</b>	Lombardia
<b>Sectors</b>	Prodotti per l'industria
<b>Sales (Mln €)</b>	34,2
<b>Enterprise Value (Mln €)</b>	79,6
<b>EV/EBITDA</b>	7,7x

The average Enterprise Value of target firms has decreased, going from 100,0 million Euro in 2014 to 79,6 million Euro in 2015. This evidence is mainly due to the dimensional decrease of target companies, with reference to revenues level, but also to employees number (89, respect to 197 of 2014).

---

## LE CARATTERISTICHE DELLE OPERAZIONI

---

Focalizzandosi sulle modalità d'investimento, nel 2015 il mercato conferma la tendenza già registrata nel 2014, con una netta prevalenza delle operazioni di Buy out, che si attestano al 77% delle preferenze (vs il 57% dell'anno precedente). Di converso, sono in calo gli Expansion con una quota del 17% rispetto al 35% del 2014. Il residuo 7% del mercato è costituito dai Turnaround (5%) e dai Replacement (2%), entrambi in linea con i risultati dello scorso anno.

In termini di deal origination, non emergono particolari inversioni di tendenza. Le imprese familiari, registrando un incremento delle preferenze (61% nel 2015, rispetto al 47% nel 2014), continuano a rappresentare larga parte delle opportunità di investimento. Le cessioni di rami d'azienda di imprese italiane scendono dal 20% al 13%.

Perdura la rilevanza dei Secondary Buy out, pur registrando un calo rispetto al 2014 (20% vs 24%). In lieve riduzione, invece, la cessione di quote di minoranza tra operatori (6%). Non si sono registrate, invece, cessioni di rami d'azienda di imprese straniere (rappresentanti l'1% nel 2014), già in contrazione lo scorso anno.

Sul fronte della distribuzione regionale, la Lombardia, regione che da sempre risulta essere il principale bacino per gli operatori, nel corso del 2015 ha rappresentato ben il 46% del mercato. Seguono a distanza l'Emilia Romagna (16% del totale) e il Friuli (8%). Il Veneto scende dall'ultimo gradino del podio, per occupare il quarto posto con il 7%. Il Piemonte conferma, invece, il numero fatto registrare lo scorso anno (6 operazioni). Nel Mezzogiorno, si sono chiuse solo tre operazioni (come nel 2014), di cui due in Sicilia ed una in Campania.

---

## DEALS CHARACTERISTICS

---

Focusing on investment stages, during 2015 the market mainly confirms the same trend of 2014, with a high prevalence of Buy out operations, which represent 77% of preferences (vs 57% of previous year). On the contrary, Expansion deals really decrease their percentage, with a share of 17%, in comparison with 35% in 2014. The residual 7% of the market is constituted by Turnaround operations (5%) and by Replacement (2%), both in line with the previous year.

In terms of deal origination, there aren't particular trend reversals. The family business, also recording an increase of preferences (61% in 2015 in comparison to 47% in 2014), continues to represent the great part of investment opportunities. The disposal of business units from national groups decreases from 20% to 13%.

Particular significance has been dedicated to Secondary Buy outs, even if with a lower share respect to 2014 (20% vs 24%). Compared to the past, the sale of minority shares between operators lightly decreases (6% of the whole market). There were no disposals from foreign groups (settled to 1% in 2014).

If we consider the regional distribution, during 2015, Lombardia, the region which always represents the main recipient for operators, has represented 46% of the whole market. Emilia Romagna (16%) and Friuli (8%) follow it away. Veneto is the fourth most important geographical area with 7% and this is significant because in 2014 this region was at the bottom of the ranking. Piemonte confirms the data of the previous year, closing 6 operations. In the South of Italy, only three deals have been closed (the same number of 2014), two of them in Sicilia and one in Campania.

## LE CARATTERISTICHE DELLE SOCIETÀ TARGET

Per quanto concerne i settori d'intervento privilegiati, gli operatori pongono la loro attenzione principalmente verso il manifatturiero, comparto che attrae il 27% delle operazioni di investimento, evidenziando un notevole decremento rispetto al 2014 (43%). I beni di consumo confermano la loro seconda posizione tra le preferenze degli investitori (17%), segnando anch'essi una decrescita rispetto al 2014 (25%). Questi due comparti rappresentano, quindi, quasi il 45% dell'intero mercato.

Il terzo comparto è quello alimentare, con il 13% (9% la quota del 2014), seguito da quello terziario (dal 9% del 2014 all'11% di quest'anno). Tornano ad essere tra i settori più attrattivi quelli del farmaceutico e biofarmaceutico e dei servizi finanziari (rispettivamente 8% e 7%, dall'1% e 2% dell'anno precedente). A seguire, cleantech e cura della persona (5%).

Con riferimento alle caratteristiche economico-finanziarie delle imprese target e, quindi, al volume di ricavi il dato mediano risulta pari a 34,2 milioni di Euro, in evidente flessione rispetto al valore del 2014.

Tuttavia, per meglio comprendere la natura del mercato, è necessario analizzare la distribuzione per classi di fatturato. Il 63% degli investimenti è indirizzato verso imprese che non superano un fatturato di 60 milioni di Euro, in aumento rispetto a quanto registrato lo scorso anno (52%). Si rileva una diminuzione delle operazioni in aziende con classi di fatturato medio-alto (30%), in particolare nelle realtà tra i 101 e 300 milioni di Euro (13%, rispetto al 20% del 2014). I deal su aziende di grandi dimensioni hanno rappresentato solo il 6% del mercato: tra questi, si rileva Saipem chiusa dal Fondo Strategico Italiano. Gli operatori esteri che hanno acquisito aziende di grandi dimensioni sono stati ben 4 su 6.

## TARGETS CHARACTERISTICS

For what concerns sector distribution, the survey shows a preference of market players for the traditional manufacturing industry, with 27% of the whole market, in great decrease in comparison to 2014 (43%). Consumer goods confirm their second position in the investors' preferences (17%), decreasing their share with reference to the previous year (25%). These two compartments together represent about 45% of the whole market.

The third compartment is food and beverage, with 13% (9% was the share in 2014), followed by tertiary (from 9% in 2014 to 11% in 2015). Pharmaceutical and biopharmaceutical (8% vs 1% in 2014) and financial services (7% vs 2% in 2014) return to be really attractive sectors. The seventh position is for cleantech and healthcare (each one with 5%).

Regarding to economic and financial characteristics of target firms, in other words the sales volume, the median value is 34,2 million Euro, recording an evident decrease in comparison to 2014 data.

However, to better understand the nature of the market, it is necessary to analyse the distribution of sales classes. 63% of investments is addressed towards firms that don't exceed 60 million Euro, in increase with reference to what we have recorded in 2014 (52%). A meaningful decrease is recorded in operations related to companies with medium-high sales classes (30%), in particular for what concerns firms showing revenues between 101 and 300 million Euro (13%, respect to 20% in 2014). Deals concerning big enterprises have represented only 6% of the whole market: the biggest one was Saipem, closed by Fondo Strategico Italiano. It is noteworthy the number of foreign investors which have acquired a share in Italian big firms (4 on a total number of 6).

## I PREZZI DELLE ACQUISIZIONI

Con riferimento al multiplo sull'EBITDA, nel corso dell'anno monitorato dall'Osservatorio, il valore riconosciuto dagli investitori alle società target si attesta a 7,65x, in aumento rispetto al 2014.

Distinguendo i multipli registrati per tipologia di operazione e in particolare tra maggioranze e minoranze, emergono le seguenti evidenze:

- ✓ il multiplo sull'EBITDA per le sole operazioni di Buy out è risultato pari a 8,9x (in decisa crescita rispetto al 6,9x del 2014);
- ✓ il multiplo riconosciuto nelle operazioni di minoranza è, invece, diminuito rispetto all'anno precedente (7,0x vs 7,4x).

Multipli così elevati nelle operazioni di Buy out trovano la loro essenziale giustificazione nella realizzazione di investimenti in aziende particolarmente rilevanti nel panorama industriale italiano (Cigierre, Teamsystem, N&W Vending, Cogipower, ICBPI, Golden Goose e numerose altre).

Il multiplo mediano rispetto al fatturato aziendale si attesta su un valore pari a 1,3x il volume delle vendite, in leggero aumento rispetto al 2014 (1,2x).

Di seguito, si riportano alcuni grafici rappresentativi delle caratteristiche del mercato ed il dettaglio delle operazioni censite.

## MULTIPLES

As for prices, during 2015 the median EV/EBITDA multiple was around 7,65x, in high increase with reference to the data recorded in 2014.

Dividing multiples recorded for each type of operation and in particular between majorities and minorities, we can show the following evidences:

- ✓ EV/EBITDA multiple of Buy out operations is equal to 8,9x. It has increased in comparison with the value of 6,9x in 2014;
- ✓ EV/EBITDA multiple of Expansion operations, on the contrary, has decreased in comparison to the previous year (7,0x vs 7,4x).

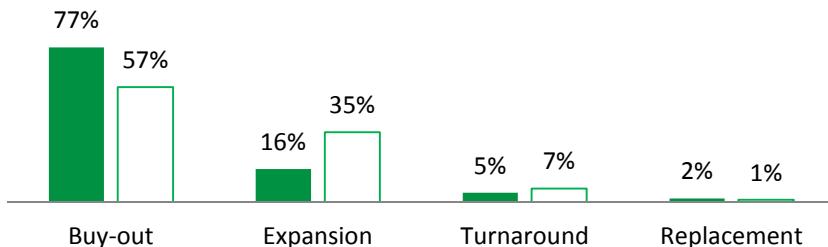

Really high multiples in Buy out operations find their explanation in this observation: a lot of deals were realized involving relevant firms in Italian industrial overview, such as Cigierre, Teamsystem, N&W Vending, Cogipower, ICBPI, Golden Goose and many others.

The median multiple for sales is equal to 1,3x, in slight increase with reference to 2014 (1,2x).

Below, we report some charts representative of market characteristics and the detail of monitored operations.

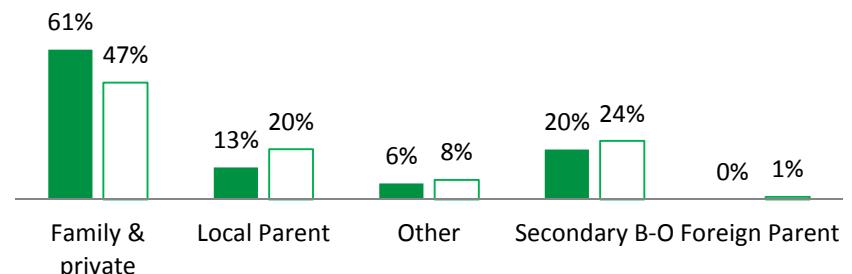

### 2015 vs 2014: % Distribution by stage of investment

**King & Wood Mallesons** is a law firm that has achieved international prominence – in large measure because of an outstanding private equity practice. Founded in 1982, SJ Berwin combined with King & Wood Mallesons on 1 November 2013 to create the first global law firm headquartered in Asia, focused on connecting Asia to the world and the world to Asia. We are recognised as leaders in our field and we have over 500 lawyers including more than 160 partners working across our offices in Europe and Middle East. Globally the King & Wood Mallesons network has more than 2,700 lawyers including more than 550 partners. We have worked on some of the largest and most complex cross-border and multi-jurisdictional transactions. Our International Private Equity team is recognised as outstanding. It's a reputation built on the variety and number of transactions King & Wood Mallesons deals with across the world, our integrated corporate, tax, regulatory and fund formation advice, and our involvement shaping the legislative changes affecting private equity. But, above all, our market leadership comes from over 30 years of experience in delivering innovative and efficient solutions for a complex and changing market. The Italian office of King & Wood Mallesons advises on matters extending far beyond fund structuring, across many asset classes: private equity, venture capital, infrastructure, debt, real estate, secondaries and fund of funds.
